OPC Strategic Plan 2020-2025

Plan Estratégico OPC 2020-2025

Goal 1: Safeguard Coastal and Marine Ecosystems and Communities in the Face of Climate Change

Meta 1: Salvaguardar los ecosistemas y comunidades costeros y marinos frente al cambio climático

Goal 2: Advance Equity Across Ocean and Coastal Policies and Actions

Meta 2: Promover la equidad en las políticas y acciones oceánicas y costeras

Goal 3: Enhance Coastal and Marine Biodiversity

Meta 3: Mejorar la biodiversidad costera y marina

Goal 4: Support Ocean Health through a Sustainable Blue Economy

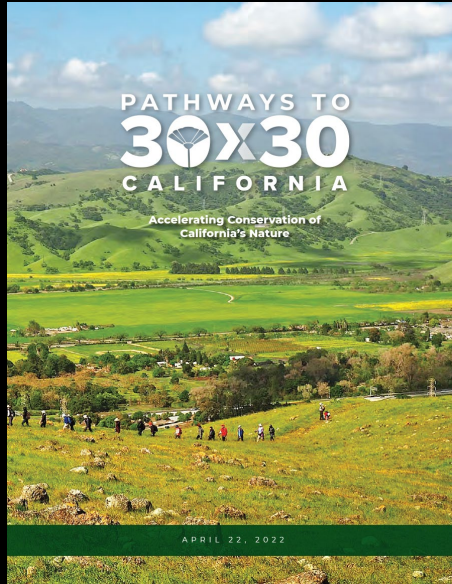

Meta 4: Apoyar la salud de los océanos a través de una economía azul sostenible

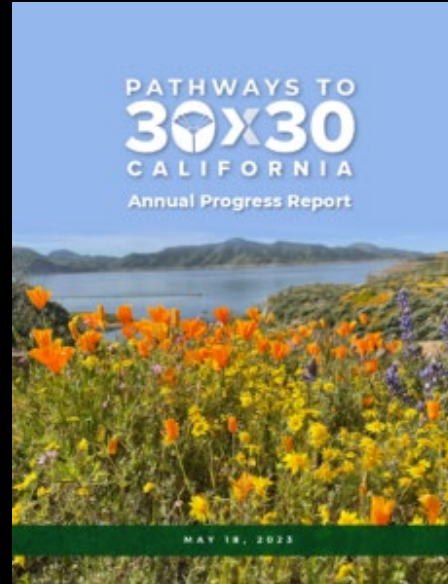

California's 30x30 Initiative

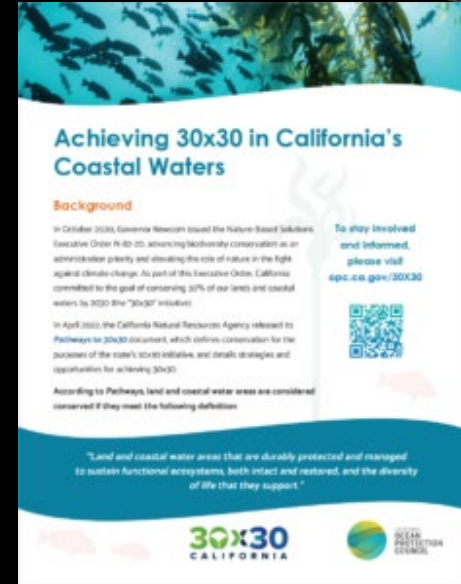

Iniciativ 30x30 de California

30x30 Conserved Area:
Durably protected with positive outcomes for biodiversity

Área Conservada 30x30:
Protegida de forma duradera con resultados positivos para la biodiversidad

Pathway 4 - Enhance Conservation

Estrategia 4: Mejorar la conservación

California's Lands and Coastal waters:

- Have exceptional biodiversity

Large areas of California:

- national, state, and regional parks, state marine protected areas, and national marine sanctuaries

Tierras y aguas costeras de California:

- Tienen una biodiversidad excepcional.
Grandes áreas de

California:

- parques nacionales, estatales y regionales, áreas marinas protegidas estatales y santuarios marinos nacionales

Why Enhance Conservation? ¿Por qué mejorar la conservación?

Opportunity to improve existing protective measures using scientific evidence and address evolving community needs → climate change resilience

Oportunidad para mejorar las medidas de protección existentes utilizando evidencia científica y abordar las necesidades cambiantes de la comunidad → y la resiliencia al cambio climático

Advancing 30x30 in Coastal Waters

Avanzando 30x30 en Aguas Costeras

1. Adaptively managing our state's MPA network
2. Enhancing conservation within our NMS
3. Supporting tribally led conservation
4. Exploring the role of other spatial management measures

1. Gestión adaptativa de la red de AMP de nuestro estado
2. Mejorar la conservación dentro de nuestro SMN
3. Apoyar la conservación liderada por tribus
4. Explorando el papel de otras medidas de gestión espacial

Adaptive Management of CA's MPA Network

Gestión adaptativa de la red de AMP de CA

Marine Protected Area :

- designed to safeguard ecosystem function and health

Adaptive Management:

- utilizes up-to-date science
- allows for flexibility and adaptivity for ongoing and anticipated needs

Área Marina Protegida:

- diseñada para salvaguardar la función y la salud del ecosistema.

Gestión Adaptativa:

- utiliza ciencia actualizada
- permite flexibilidad y adaptabilidad para las necesidades actuales y anticipadas

Enhance Natural Marine Sanctuaries

Mejorar los santuarios marinos naturales

National Marine Sanctuaries:

- important for marine life and habitat conservation

OPC is working closely with federal partners:

- to identify threats to Sanctuary resources
- and opportunities to address these threats

Santuarios Marinos Nacionales:

- Importantes para la vida marina y la conservación del hábitat.

OPC está trabajando estrechamente con socios federales:

- para identificar amenazas a los recursos del Santuario
- y oportunidades para abordar estas amenazas

Support Tribally-led Conservation

Apoyo de la conservación liderada por tribus

OPC will be working in partnership with California Native American tribes to establish Indigenous Marine Stewardship Areas (IMSAs).

Concept will be developed through consultation and collaboration with tribes.

OPC trabajará en asociación con las tribus nativas americanas de California para establecer Áreas de Administración Marina Indígena (AAMI).

El concepto se desarrollará mediante consultas y colaboración con las tribus.

Explore Other Spatial Management Measures

Explorar otras medidas de gestión espacial

California's coastal waters include a range of spatial management measures beyond MPAs and NMS.

OPC is:

- Inventorying the scope and ranges of these measures
- Understanding how durable and what biodiversity benefits exist

Las aguas costeras de California incluyen una variedad de medidas de gestión espacial más allá de las AMP y los SMN.

OPC está:

- Haciendo un inventario del alcance y rangos de estas medidas
- Comprendiendo qué tan duraderos y qué beneficios existen para la biodiversidad

Progress to Date Avances hasta la fecha

- Marine Protected Areas
- National Marine Sanctuaries
- Indigenous Marine Stewardship Area (IMSA)
- Spatial Management Measures Inventory
- Community Engagement
- Áreas Marinas Protegidas
- Santuarios Marinos Nacionales
- Área de Administración Marina Indígena (IMSA)
- Inventario de medidas de gestión espacial
- Participación de la comunidad

Funding Opportunities

[↑ Back to Top](#)

The Newsom administration has made historic investments in protecting biodiversity, expanding access to nature, and tackling climate change. To support 30x30, the 2022-2023 state budget allocated \$1.1 billion to support nature-based programs across the state. [More information on the 2022-2023 state budget can be found here.](#)

The California Natural Resources Agency hosted a 30x30 Virtual Expo Series in the fall of 2022 to provide information and answer questions about programs, funding, and resources available to support California's 30x30 Initiative goal. More information on the grant programs can be found at the links below as well as contact information and recordings from the 30x30 Virtual Expo Series.

30×30: Conserving 30% of California’s Coastal Waters by 2030

What is 30×30?

In 2020, Governor Gavin Newsom issued [Executive Order N-82-20](#), which committed to conserving 30% of California’s lands and coastal waters by 2030 as part of a broader effort to fight climate change, protect biodiversity, and expand access to nature for all Californians. In 2022, the California Natural Resources Agency (CNRA) released [Pathways to 30×30: Accelerating Conservation of California’s Nature](#), which details strategies and opportunities for achieving the 30×30 target.

See our [Fact Sheet](#) for details on OPC’s approach to 30×30 and answers to frequently asked questions.
